

Giltgrip 22 Carpet Adhesive

BPIR Declaration

Version: 1

Designated building product: Class 1

Declaration

importer Gilt Edge Industries has provided this declaration to satisfy the provisions of Schedule 1(d) of the Building (Building Product Information Requirements) Regulations 2022.

Product/system

| | |
|-------------------|---------------------------------|
| Name | Giltgrip 22 Carpet Adhesive |
| Line | Polymer emulsion based adhesive |
| Identifier | GG22 |

Description

Giltgrip 22 is a water-based Latex adhesive with low in VOC and has been specifically formulated to provide extra open time for positioning of long runs of commercial carpet before it develops its “leggy” grab and holding power for jute & action backed tufted carpets, woven wilton & axminster carpets and most needle-punched carpets.

Scope of use

For bonding tufted secondary backed carpets (jute, soft and action backed), woven wilton & axminster carpets, most needle-punched carpets as well as cushioned Double Bond underlays to sound, smooth dry subfloors of concrete; conventional sand/cement screeds or underlayment; plywood; hardboard or cement sheet underlays.

Conditions of use

All surfaces to be bonded shall be dry, smooth, sound and clean. Subfloors must also be free of wax, grease and hydrostatic pressure. The minimum subfloor temperature before commencing surface preparation and adhesive application is 100C. It is recommended that all absorbent substrates be primed with a suitable Acrylic Primer prior to the application of adhesive. Apply using a „V” notched trowel spreader, 1.6mm x 1.6mm x 1.6mm giving a spread rate up to 5m²/litre to adhere the double bond underlay to the entire subfloor area. Use a 2.4mm x 2.4mm x 2.4mm „V” notched trowel

giving a spread rate up to 3m²/litre to adhere smooth back carpet to subfloors or double bond underlay or 3.2mm x 1.6mm x 3.2mm „V“ notched trowel giving a spread rate up to 2m²/litre for coarse back, woven or action back carpets to subfloors or double bond underlay. Check to ensure that complete transfer of adhesive to the carpet/underlay has occurred. Roll finished installation with a 25-35Kg roller. Complete the installation according to the adhesive manufacturer's instruction. Do not allow heavy traffic for 24 hours. All Seams should be seamed sealed using a suitable seam sealer. It is strongly recommended that Dual bond seaming tape be used on all seams in double bond installations.

Relevant building code clauses

Contributions to compliance

Building Regulations 1992 - Clause 2B-Durability GiltGrip 22, with only normal maintenance, will continue to satisfy the performance requirements of Building Regulations for 15 years.
