

Product Introduction to NZ.

Product Code: 12249

Uzin KE68T Single component Hybrid adhesive.

Uzin KE68T adhesive is a single component high performance 'urethane type' adhesive that is suited to a large range of installations requiring high dimensional stability in extreme conditions such as sun-drenched areas, high point loading and areas requiring water-resistance from the top of the floorcoverings (wet areas).

Uzin KE68T adhesive is suited to installations on floors and walls.

Applications:

- Rubber tiles up to 4.0mm (e.g Norament)
- Luxury Vinyl Tiles in all areas including areas subjected to direct sunlight with constant stability available at temperatures **NOT exceeding 50deg C.**
- For PVC and CV tiles- on floors and walls.
- For granulate recycled rubber flooring systems (Regupol etc)
- Linoleum tiles up to 4.0mm thick.
- Indoor entrance mats subjected high traffic and exposure to water.
- Artificial grass installations and sports flooring.
- **For heavy wear commercial and industrial applications.**

Key features:

- **Single component – Ready to use with no mixing required.**
- **Solvent free.**
- **Compliments the range: KE66 and KR430**
- **Opague/White coloured adhesive.**
- **Easy to trowel.**
- **Excellent high temperature stability.**
- **Very high cured bond strength.**

Note:

- **Surface water must be removed within 24 hours.**
- **For longer term/sustained exposure to surface water refer to Uzin KR430 2-part adhesive.**
