LAMINATE & HYBRID (LOOSE LAID) FLOORING OVERLAY WET ROOMS WATERSPLASH INSTALLATION SYSTEM ALTERNATIVE SOLUTION - E3/AS1 BUILDING CODE- INTERNAL MOISTURE FOR FINISHES TO FLOORS: BATHROOMS

Must be read in conjunction with E3/AS1 November 4th 2021 Building Code. The following information is only to assist in the Alternative Solutions options for the installer. It is essential the Laminate supplier provides their own documentation as to the floorcoverings suitability as required by E3/AS1.

- ① Concrete substrate treated with Protect Crete Densi-Proof (Optional.)
- ② Subfloor Preparation Systems (Optional site specific as required.)
Subfloor primed with Uzin PE280 (Non-porous) or Uzin PE286 (Porous)
OPTION 1.) Uzin NC164 SP or NC168 SP Levelling Compound
OPTION 2.) Uzin NC888S/NC888F Skim Coat
- ③ Proprietary Moisture Resistant Underlayment
(as per systems recommended by the Laminate or Hybrid Flooring Supplier.)
- ④ Interlocking Laminate or Hybrid Flooring System
