

ON THE FLOOR

LATEST NEWS - NEW RELEASES - SPECIAL DEALS

JANUARY - MARCH 2021

FROM THE DESK:

Dear Clients ,

Welcome to 2021 and let's hope this year brings us far more certainty, stability and ongoing progress in the fight against Covid 19. New Zealand is one of the safest countries to live in currently and with numerous reasons to believe the strong economic activity we've experienced in the back half of 2020 will continue this year .

We are working hard to maintain good stock levels in what is a very challenging global supply chain environment and are pleased to highlight in this edition two new flooring trim profiles based on trade demand and a shipment of the Wolff Undercut Saws - a precision made high quality saw unit for the professional timber and laminate installer.

We launched Uzin Deep Fill in late 2020 with pleasing results – see below our promotion designed in incentivise you to try it.

We are also pleased to welcome Damian Drescher to our Auckland based sales team as our specialist Protect Crete Technical Consultant as we look to expand our presence in the concrete protection and treatment sector. Damian has had a number of years as a professional applicator and technical advisor in the Auckland and North Island market.

Best regards
Chris Dickey
Managing Director

UZIN DEEP FILL SUPER DEAL

CODE:UZDF20

- Cost effective Deep Fill for use between 5 mm to 50 mm prior to the application of UZIN smoothing compounds.

COMMERCIAL PROJECT HIGHLIGHTS

Protect Crete X550 CARPARK Warehouse™ & X100 Green Cure.

Auckland based concrete placing specialists RGC Business Development Manager Brent Atkinson needed a solution for the concrete treatment of a large new warehouse development in Wiri being built by Bodley Construction.

For the 7,800m2 warehouse Brent chose X550 CARPARK Warehouse™ for rapid application and superior finish. X550 CARPARK Warehouse™ is a proprietary silicate silicate water based formulation which can be applied to new and existing concrete, providing an excellent cure regime, reduced dusting, surface hardening and stain repeller resistance from oils, and is compatible with line marking acrylic or solvent based paints.

Achieves the cure requirements of NZS 3109:1997 & NZS 3101: Part1:2006. Has no effect on inherent slip coefficient of the surface.

For the 5,000m2 exterior access and loading areas Brent chose Protect Crete X100 Green Cure for a fast and cost effective curing method. X100 Green Cure is a non membrane forming colloidal silicate proprietary solution that provides an exceptional cure regime equal to water pond curing, with no water required. It is applied to the concrete surface immediately after initial set. Conforms to and achieves the cure requirements of NZS 3109:1997 and NZS 3101: Part 1:2006. Has no effect on inherent slip coefficient of the surface

For specialist Protect Crete concrete treatment application Brent used grinding and finishing specialists Solid Floors Limited, with director Grant Fosters skill to achieve outstanding concrete finishing results, when applying X550 CARPARK Warehouse™ to burnished surfaces.

Another Commercial project completed utilizing the Gilt Edge Commercial team for advice and application details.

ROBERTS™

550 ADHESIVE SOFTENER

Roberts 550 Adhesive Softener is a water dispersible solution designed to soften, loosen and assist in removing water based adhesives from subfloors and other surfaces. It is also useful for cleaning waterborne spray adhesives and coatings from guns and lines.
