

ON THE FLOOR

LATEST NEWS - NEW RELEASES - SPECIAL DEALS

MAY - JULY 2022

FROM THE DESK:

Dear Clients ,
Welcome to the May – July Edition . We're pleased to launch Guardboard - a quality Australian made hard flooring protector suitable for commercial/ domestic environments (available now), together with the RO-2 Heavy Duty Stripper of which several are in transit from Europe due late June . We have a demo machine available – please contact your Gilt Edge Rep. to discuss.

Finally, please see page 3 where our Architectural Technical Consultant, Ian Williams details support we offer concerning the Building Code E3/AS1 Alternative Solution Options (effective from 5/11/21), relating to changes around the type of floor finishes to be used in kitchens, laundries, bathrooms and toilets that need council consent.

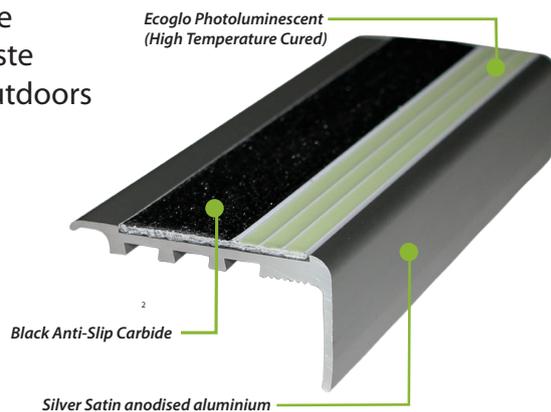

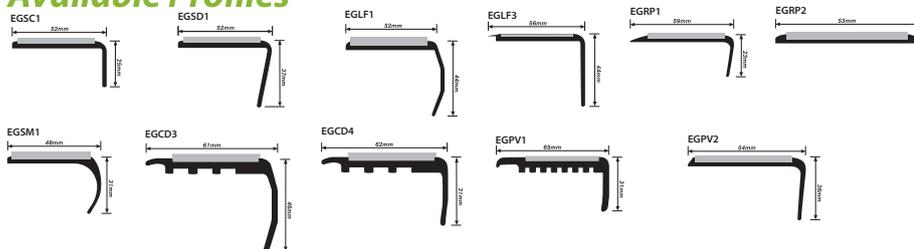

Best regards
Chris Dickey
Managing Director

GILTGRIP ECOGLO STAIR NOSINGS

The benefits of Giltgrip Ecoglo (photoluminescent) Stair Nosings are clear when compared to other alternatives. Giltgrip Ecoglo Stair Nosings are cost effective, sustainable, durable and failsafe.

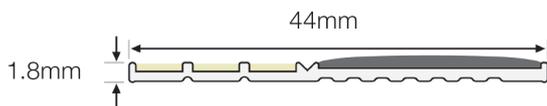

- Utilise ambient light in most cases meaning little or no power usage
- No replacement parts ie no batteries or lamps, so no hazardous waste
- Extremely durable - warranted for 30 years indoors and 15 years outdoors
- Operate instantly each time the power fails

Available Profiles

Photoluminescent Step Edge Contrast

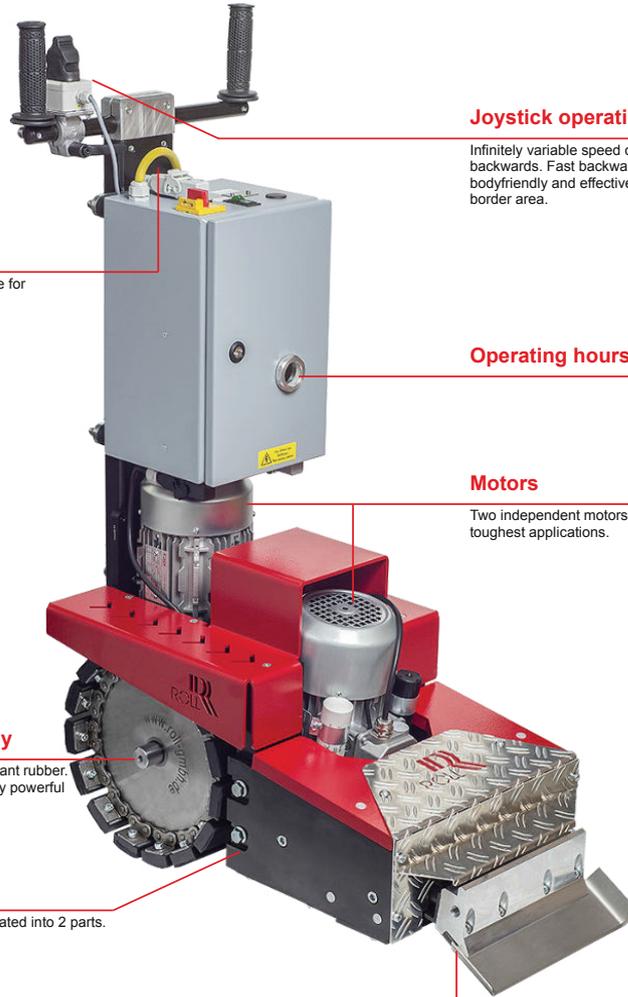

The Ecoglo PL Step Edge Contrast is designed to ensure visibility of steps in escape routes to meet NZBC Clause F6 "Visibility in Escape Routes". The Step Edge contrast will be effective in all light conditions including failure of the main lighting.

Ask your Gilt Edge Sales Consultant for further information and pricing.

STRIPPER RO-2

Individual operation

The handle element is multiple adjustable for individual adjustment to the user.

Joystick operation

Infinitely variable speed control forwards and backwards. Fast backward speed saves time, is bodyfriendly and effective when working in the border area.

Operating hours counter

Motors

Two independent motors with power reserves even in toughest applications.

Innovative drive technology

Driven by chains made of abrasion resistant rubber. Through the polygon wheels a particularly powerful drive is guaranteed.

Transport

The ROLLSTRIPPER RO2 can be separated into 2 parts. Additional air tires included.

Striking mechanism

An adjustable stroke of the stripper tool (3 levels) enables individual settings depending on the floor covering.

• Made in Germany

Development and production in Sonnenbühl

• Use in noise sensitive areas

Low vibration and noise level

• Effortlessly working

Stepless joystick control back and forth

• No slipping of the wheels

Through hightraction chain wheels with large contact

• Less tool wear

Through hardened and resharpenable tools

BLADES SUPPLIED WITH UNIT

Stripper tool 250x80x2mm flat (type 12)

Stripper tool 250x80x2mm U shape A, (type 42)

Compact stripper machine with chain drive for professional removal of glued floor coverings such as parquet, carpeting, linoleum, PVC and vinyl.

Special features:

- powerful industrial motors
- innovative drive technology
- innovative tool technology
- joystick operation
- low vibration and noise level
- easy to transport

Areas of application:

- Removal of parquet
- Removal of elastic floor coverings
- Removal of textile floor coverings
- Removal of PVC floor coverings

Technical specifications:

Drive engine:	1,5 kW, 230 volts with worm gear
Torque:	327 Nm
Stroke engine:	1,1 kW, 230 volts
Blow count:	2500 beats per minute (bpm)
Stroke length:	adjustable in 3 levels
Working width:	up to 350 mm
Dimensions:	380 x 760 x 1100 mm
Weight:	195 kg

Included in delivery:

- Stripper tool 250mm flat
- Stripper tool 250mm Ushape
- 10m industrial extension cable
- Tool kit
- Carrying handles
- Personal protective equipment
- Transport wheels with pneumatic tires

Gilt Edge Train and Support Flooring Contractors with Sound E3 Building Integrity Subfloor Preparation and Flooring Installation Systems.

By Ian Williams- Gilt Edge Architectural Technical Consultant

NZBC Clause E3 Internal Moisture is now in the spotlight: 3 to 6 story Medium Density Housing has become the new normal. Healthcare and Education projects are demanding Total Systems Solutions incorporating BRANZ Appraised Waterproof Membrane Systems. If left unmanaged there are E3 Building Integrity project demands by local authorities such as PS3 producer Statements, and lack of Systems Training, that can have a negative impact on the flooring contractor's ability to supply E3 Building Integrity Solutions in these times of change.

Solution to New NZBC Clause E3-AS1 Internal Moisture 4.11.21: Gilt Edge Architectural have developed specifications for Luxury Vinyl Tile (LVT) and Laminate Overlay Wet Rooms Containment and Watersplash Installation Systems used in kitchens, laundries, bathrooms, and toilet areas where a building consent for new or refurbished work is required to comply with E3/AS1 building code.

E3/AS1 Seamless Flooring Systems Links: [Specifications -E3/AS1 - Gilt Edge \(SCAN QR CODE\)](#)

Training and Project Support: Gilt Edge staff can train flooring contractors to become Certified Applicators of the BRANZ Appraised Flexi-Seal PUD Waterproof Membrane System. An applicator gets a Certification Number and registers on the RLA Bondlast Website. They can then supply a PS3 to meet Clause E3 Internal Moisture securing a Fifteen Year Product Warranty. Integrated into both our Second Line of Defence Sheet Vinyl, and E3/AS1 Systems, Flexi-Seal PUD Certification enables flooring contractors to secure E3 Projects.

Project Example - Second Line of Defence Sheet Vinyl:

Wairau Valley Special School Disabled Access Wet Room installation. Council required a BRANZ Appraised Waterproof Membrane System and PS3 sign off by the flooring installer. Being a Flexi-Seal PUD Certified Applicator flooring installer Sonny's Flooring was able to supply a PS3 to project head Niche Flooring to meet Council requirements. Gilt Edge supplied Certified Applicator Training, Technical Specifications, and site assistance. A quality E3 Building Integrity installation was achieved ensuring long term building performance.

Project Example- E3-AS1 Containment System for Laminate:

A new architecturally designed family home in Auckland chose Laminate flooring installation throughout including upstairs wet rooms bathroom, ensuite and toilet. Council required a BRANZ Appraised Waterproof Membrane System and PS3 sign off by the flooring installer. This new E3/AS1 Clause definitions is Containment. Yet again flooring installer Sonny's Flooring was able to supply a PS3 for the project to meet Council regulations where containment is required.

Gilt Edge Architectural have developed fully warranted E3 Building Integrity Systems, Training and Support to help flooring contractors nationwide:
