LATEST NEWS - NEW RELEASES - SPECIAL DEALS

AUGUST - OCTOBER 2018

FROM THE DESK:

Welcome to the August-October edition of the Gilt Edge newsletter. In the past few months we have been promoting to the commercial sector our Seamless Flooring Systems featured in our last newsletter.

We have recently partnered with Eboss, the online product library providers and have been involved with them in a number of architect presentations to prominent architect practises in Auckland presenting these new Seamless Flooring Systems where we received great feedback and were able to advise them on specifications for a number of upcoming flooring projects.

We also attended the BuildNZ trade show held at the Auckland ASB Showgrounds in July and presented our new Seamless Flooring System modules that exhibit the entire system for a number of top floor coverings.

We have recently added to our website some new sections highlighting these Seamless Flooring Systems as well as a number of Case Studies and a new Product literature area where all our recently produced brochures are available to download. Check it out!

Inside this month's newsletter we have a number of new products we feel will be of great benefit to you as well as highlighting a number of existing lines.

We hope you enjoy the read.

Best Regards
Gary Clark
National Sales Manager – Gilt Edge Industries Ltd.

New Information Brochures Now Available!!

We are pleased to announce we have recently produced a suite of informative brochures to help with selection of flooring preparation products.

These product information brochures are available to download from our website www.giltedge.co.nz or ask your Gilt Edge Sales Consultant to provide these to you.

For your LVT, Sheet Vinyl projects where a waterproof membrane is required.

AVAILABLE NOW

Flexi-SEAL P.U.D Water Proof Membrane 15L

Flexi-SEAL PUD is a blue, water based polyurethane modified, flexible water proofing membrane. Can be used over concrete, render, rendered brick work, block work, fibre cement, plywood and particle board surfaces. Can be used for internal or external waterproofing applications.

Coverage: 1m² per 1.5L per two coats

Code: RFPWFLEX15

UZIN SC966 Rapid Screed Pre-mix.

Pre-mixed rapid screed mortar with very rapid drying ability – interior and exterior

- Mixes only with water, totally reliable in use.
- Ideal for small areas, no waste material.
- Very rapid setting and drying, saves time. (can be set for foot traffic in 3 hours)
- Economical 30kg packaging.

Code: UZSC96630

Applications:

- For producing bonded and floating screeds, screeds on separating membranes or heated screeds.
- For producing low-slump repair mortars.
- For screed work under time pressure.
- Used for bulk filling.
- Ideal for economically creating ramps and large falls in concrete substrates.

COMMERCIAL PROJECT HIGHLIGHTS

Seamless Flooring System Future-proofs Hospital Wet Areas

This Seamless Flooring System features a built-in waterproof membrane to prevent leaks and water damage at Middlemore Hospital's new Acute Mental Health Unit.

CHALLENGE: Designed by Klein Architects, the new Acute Mental Health Unit at Middlemore Hospital. Longevity was a key requirement for the design, and a key component of this future-proofing was the specification of flooring for ensuites and other wet areas. While vinyl has traditionally been the go-to for wet area flooring and walls in hospitals, Klein Architects aimed to ensure the integrity of the interior structure beyond the vinyl by adding an extra layer of protection.

SOLUTION: The chosen Seamless Flooring System includes a comprehensive build-up for concrete floors — from primers, bulk fill, mortar and waterproofing, right through to the adhesive for vinyl application. Key for the system's durability is a flexible waterproof membrane layer, which is installed beneath the vinyl to provide a second line of defence from moisture ingress. The system comes with a single system warranty, ensuring peace of mind for both clients and architects.

RESULT: The system was designed by Gilt Edge Industries Ltd. in response to issues where penetration of vinyl in wet areas had caused leaks, over time rotting out framing and affecting the structural integrity of the building. A BRANZ appraised waterproofing membrane sits under the vinyl and protects the vinyl breaks. It runs up the wall and around the floor in the wet zone, to stop any ingress of moisture.

Not only did Gilt Edge provide the full specification for this project, but they also advised on installation, training vinyl flooring installers on how to install the full waterproof system. This has been beneficial for the clients, Counties Manukau Health, who have now requested the system be used in future.

New Uzin NC888 Foldable Crate Deal!!

Get A Free Uzin
Foldable Plastic Crate
with every purchase
of six bags of Uzin
NC888 feathering
compound.
