

ON THE FLOOR

LATEST NEWS - NEW RELEASES - SPECIAL DEALS

FEBRUARY - APRIL 2018

FROM THE GILT EDGE DESK

Welcome back to our first 2018 On The Floor newsletter.

We hope everyone had a great Christmas break and are well rested and ready to get back into the New Year.

We are pleased to announce that we have added over the break two new work sections to our current offering in Masterspec under the categories of Carpet Underlay and Stair Nosings, Transition bars and Trims.

The Carpet Systems section 6511GE incorporates our range of underlay, adhesives & carpet accessories for conventionally laid, double bonded and direct stick applications for both residential and commercial applications.

The Stair Nosings, Transitions and Trims section 6614GE includes our range of the Gradus XT and Anti-slip profiles as well as our extensive range of floor finishing transitions.

The new work sections will make it easier for architects and specifiers to include these products when designing and planning new projects. This in turn will also help you when quoting new projects specified in Gilt Edge products.

In this issue we have a number of New Products and information we hope will benefit you in the future.

Best Regards
Gary Clark
National Sales Manager
Gilt Edge Industries Ltd.

COMMERCIAL PROJECT HIGHLIGHTS

Rototuna School Sports Gymnasium

Challenge: At Rototuna School, Hamilton, Lobell Construction were given the task of having a large concrete floor levelled to install a high quality sprung gymnasium timber flooring system that required minimal variation in the substrate surface.

Solution: Specialized Flooring were contracted to undertake this project of approx. 1,000sqms of floor area.

They measured the floor for height variation with specialised laser equipment in 4sqm grids. Uzin self-adhesive levelling pins were placed and cut to the height required and Uzin PE280 water based fast drying primer was used prior to 450bags of Uzin NC160 self-levelling compound being mixed and applied to produce a level floor.

Result: Another quality Gilt Edge Flooring System specified using Uzin products to produce a quality level floor for the sprung timber floating system to be applied upon and provide the school with a gymnasium floor they can be proud off.

Selwyn Residential Care Facility

Challenge: To assist Klein Architects in developing a Gilt Edge Seamless Flooring Specification for the new 5,500m2 Selwyn Residential Care Facility in Pt Chevalier, Auckland, using Gilt Edge's Masterspec Sections, with a focus on eliminating high moisture issues in the sub floor, and ensuring full system compatibility.

Solution: GEIL Technical Consultant Ian Williams developed all associated Masterspec Specification Sections with the architect, which included:

- Protect Crete application at time of pour to cure, densify and moisture control the slab (see application by the Contractors Concrete Specialist Ltd).
- UZIN Levelling Systems for floor preparation of all selected top flooring categories.
- GEIL specialist adhesives, transitions and nosings for all top flooring categories installation.

Result: Klein Architects were able to save time and gain key technical specification expertise at no cost. As the project progresses GEIL assist the project managers, lead architects and flooring contractors with technical on-site advice resulting in a quality installation for all stakeholders in the project.

Gilt Edge Garage Carpet Floor Packages!

SOLUTION SYSTEMS

How can a new floor covering be bonded quickly and easily to existing wearing surfaces?

With the **UZIN® Sigan 2**.

Tearing out existing wearing surfaces is elaborate and accompanied by inconveniences as well as unproductive downtimes. Sigan 2 offers a quick and sure solution and what's more, it can be removed without residues even after years. New PVC, CV nora rubber flooring can be installed quickly and clean on existing PVC or linoleum substrates using the switchTec adhesive technology from UZIN.

For further information on Uzin Sigan 2 contact your Gilt Edge Sales Consultant
