Email: help@giltedge.co.nz

Reference Code: 31071

Installation

It should be ensured that all surfaces to which the profile is to be fixed are sound, dry, flat and free from any contaminants. Wall surfaces should be free from any previous coverings, linings or adhesive residues used to fix them. Paint films and any mould must be removed and the affected surface treated correctly.

Apply Gilt Edge Double Sided Scrim Tape to either the wall or the profile depending on the installer preference

Maintenance

A regular scheduled maintenance programme prevents build-up of dirt and grease, which will reduce properties of and detract from the overall appearance of the product. Brush down the profiles using a soft bristled brush.

With clean warm water, apply a small amount of a soap-less detergent to a wet green scotch pad and gently clean the surface of the profile along it's width with fresh, clean water and dry with a dry lint free cloth.
