Installation

- 1) It should be ensured that all surfaces to which the profile is to be fixed are dry, flat and free from any contaminants.
- 2) Cut the profile to the size required.
- 3) Apply a bead of proprietary cartridge adhesive to the underside of the profile, then, ensuring the substrate is free from dust, firmly place the base into position
- 4) Ensure the profile cannot be disturbed while the adhesive cures

Maintenance

A regular scheduled maintenance programme prevents build-up of dirt and grease, which will reduce properties of and detract from the overall appearance of the product. Brush down the profiles using a soft bristled brush.

With clean warm water, apply a small amount of a soap-less detergent to a wet green scotch pad and gently clean the surface of the profile along it's width with fresh, clean water and dry with a dry lint free cloth.
